JUNE 25, 2009	\$600.00	\$600.00

WATERWORKS CAPITAL INVESTMENT STRATEGY

The objective of the waterworks capital investment strategy is to address anticipated waterworks infrastructure maintenance, the immediate drinking water infrastructure problems and future infrastructure replacements in a timely fashion so as to ensure the municipal waterworks provides safe drinking water to residents and businesses. The strategy uses the 2006 waterworks system assessment that was required by Saskatchewan Environment for infrastructure planning

To cover the costs of future waterworks infrastructure maintenance and replacements, Council will likely need to undertake in the future a combination of increasing water rates to build the waterworks reserves. The capital investment strategy will ensure that safe drinking water can be provided to the residents, businesses, and surrounding rural community in the present and future.

Capital plans are being worked on for the replacement of our existing water treatment plant.

ANNUAL WATERWORKS FINANCIAL OVERVIEW
